

TechBiz Global

Subject: Application for .Net Developer

Dear Hiring Manager,

I am writing to express my strong interest in the **.Net Developer** position at **TechBiz Global**. With over 6 years of professional experience designing, developing, and optimizing scalable enterprise web applications, I specialize in the exact full-stack ecosystem your team relies on: **.NET Core (6/7/8) and Angular**.

Throughout my career at companies like WiseMan Innovations and Contour Software, I have successfully engineered high-performance backend systems and dynamic frontend user interfaces. My technical foundation is rooted in **Clean Architecture, CQRS, and SOLID principles**, ensuring that the software I build is not only production-ready but highly maintainable and testable.

Key highlights of my background that align with your team's needs include:

- **Robust Backend Engineering:** Expert-level development using C#, ASP.NET Core Web APIs, Entity Framework Core, and SQL Server, with a sharp focus on query optimization, database design, and secure authentication.
- **Modern Frontend Mastery:** Seamlessly bridging the gap between data and design by building responsive, state-driven client applications using Angular, TypeScript, and Angular Material.
- **DevOps & Testing Culture:** Active participation in CI/CD automation pipelines via Azure DevOps, combined with a strict adherence to testing standards using xUnit, NUnit, and Moq.

What excites me most about **TechBiz Global** is your commitment to [mention a project, company value, or technology they use, e.g., building high-performance fintech solutions / driving digital transformation]. I thrive in agile, fast-paced environments where architectural precision and clean code are prioritized. As an international candidate, I am looking for an organization that values global talent, and I am confident that my transition to your local team will be swift, seamless, and immediately productive.

Thank you for your time, consideration, and review of my attached resume.

Sincerely,

Usama Bin Shafique

Senior Software Engineer | Full-Stack Developer
